Ronnie Ridge Technologies

Ronnie Ridge Technologies fuels business growth through intelligent digital transformation—blending software, AI, and innovation to unlock your next level.

About Ronnie Ridge Technologies

Ronnie Ridge Technologies is a USA-registered IT company helping businesses grow through smart digital solutions. We specialize in custom software development, AI integration, and full-scale digital transformation. With a global mindset and a high-performance team, we turn ideas into scalable success.

01 Our Mission

Our mission is to empower businesses through intelligent digital solutions that drive measurable growth.

02 Our Vision

To shape a future where technology drives limitless business growth.

03 Our Value

We value innovation, integrity, and long-term partnerships.

Our Offerings

We offer a comprehensive suite of digital solutions including website development, mobile app development, and UI/UX design to help businesses thrive in the digital landscape. We specialize in cutting-edge technologies such as generative AI, conversational AI, and voice AI to deliver intelligent, future-ready applications. Our team also excels in website designing, WordPress and Shopify development, ensuring visually stunning and high-performing platforms. To maximize your brand's reach, we provide result-driven digital media marketing services that boost visibility, engagement, and growth.

1

LEGAL HELPLINE

Legal Helpline is a multi-vendor platform designed to connect lawyers and clients in a streamlined, user-friendly environment. Lawyers can create profiles to offer their services, manage client interactions, and utilize a dedicated case diary to organize, track, and update all their legal cases in one place. Clients can easily search for legal professionals, book consultations, and receive ongoing support. With features like secure communication, appointment scheduling, and smart case management, Legal Helpline simplifies and digitizes the entire legal service experience for both clients and lawyers.

PORTFOLIO

2
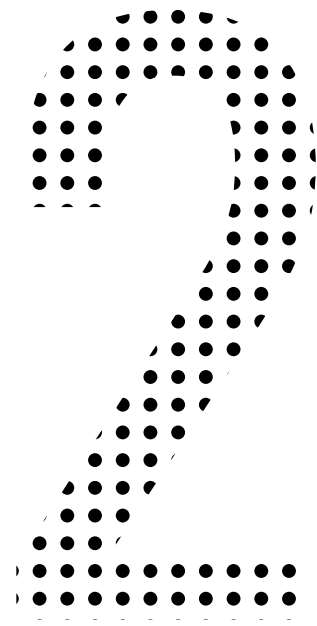

MYKAAPTAN

MYKAPTAAN is a complete restaurant management system designed for seamless operational control.

Restaurants can sign up to manage staff, kitchen workflows, inventory, purchase orders, and detailed reports.
It includes built-in POS functionality to handle daily sales, cash orders, and account tracking.
Features like loyalty programs and financial reports make MYKAPTAAN ideal for end-to-end restaurant management.

3
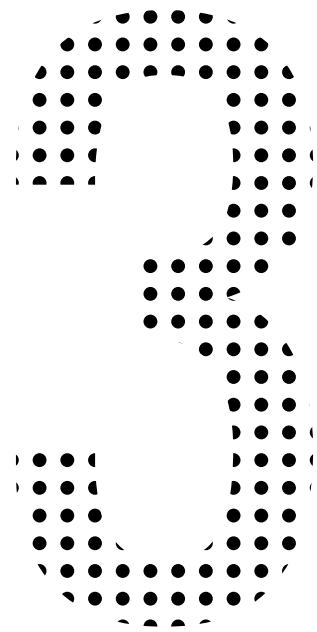

NEWTONED

NewtonEd is an AI-powered school learning and management system designed for modern education.
It helps students learn through AI-generated transcripts, quizzes, text, images, and videos for deep understanding.
Features include smart learning tools, student reports, and dedicated portals for teachers, students, parents, and admins.
NewtonEd streamlines school operations while enhancing personalized learning through advanced AI.

4
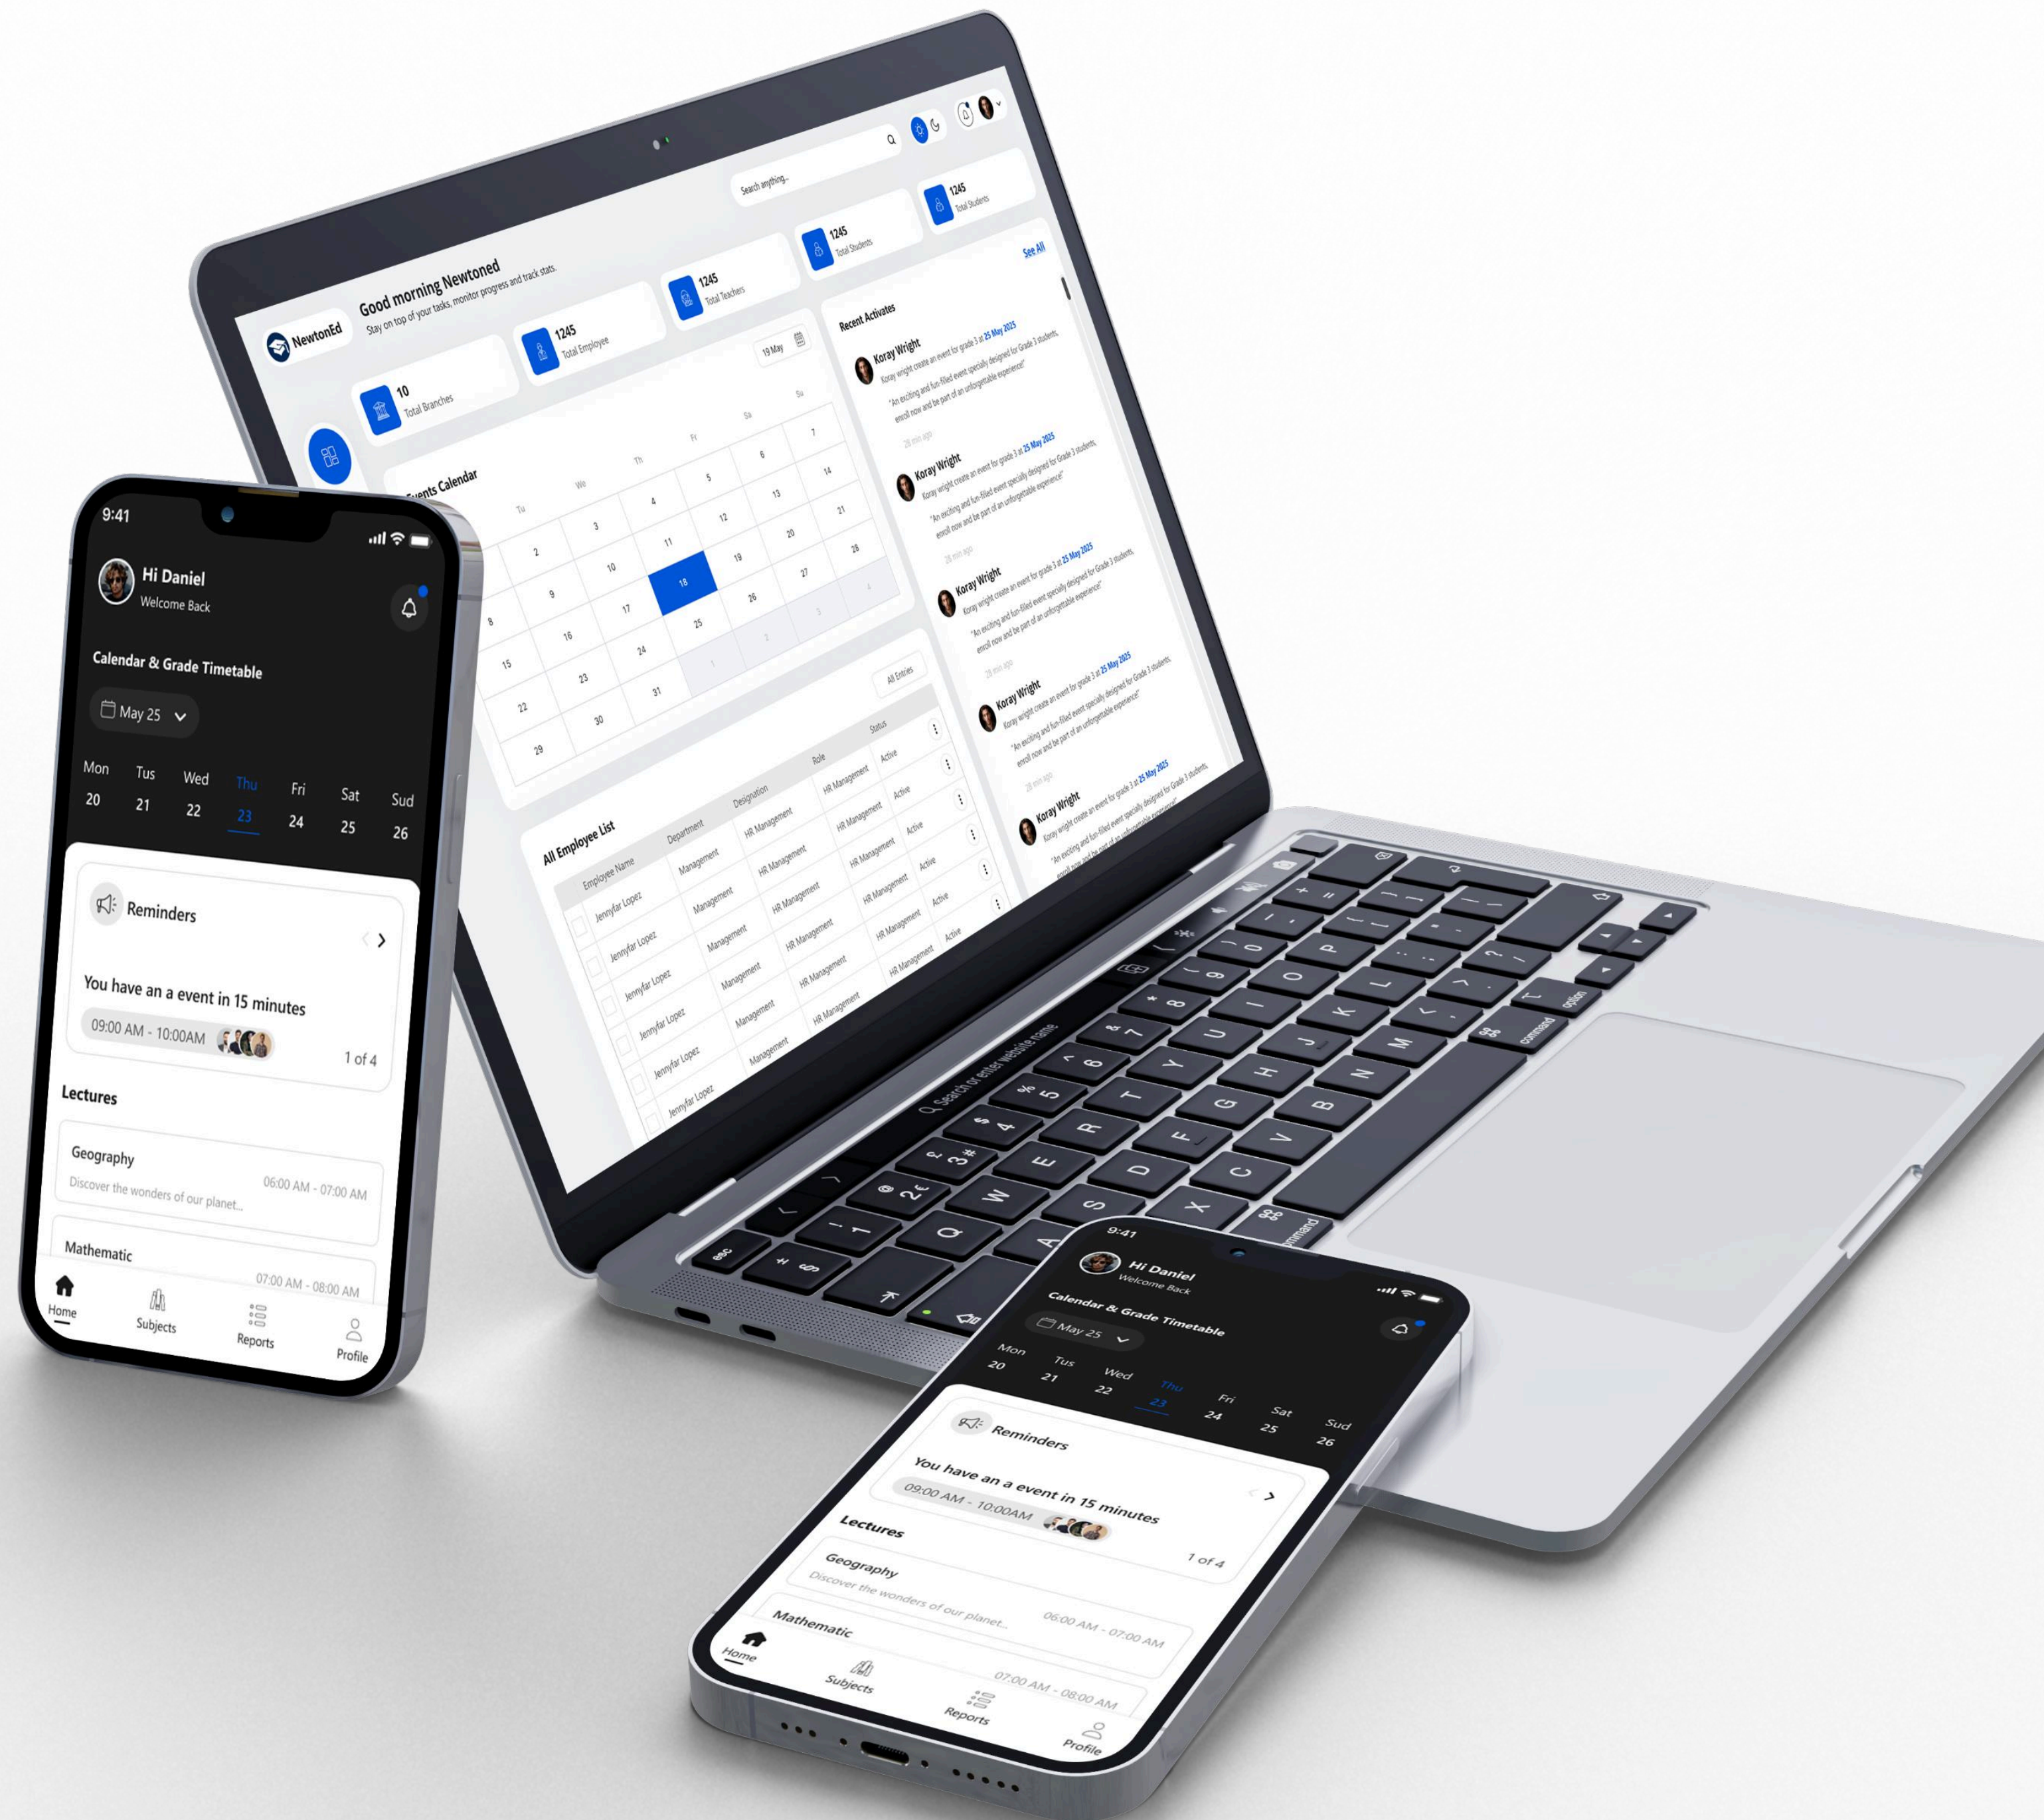

VCLAIR GROUP

VClair Group is a service-based platform specializing in kitchen renovations, offering custom cabinetry solutions and advanced vent-less technologies. Whether it's upgrading kitchen layouts, optimizing storage, or installing modern ventilation systems, VClair provides tailored solutions that combine style, functionality, and innovation all in one place.

5
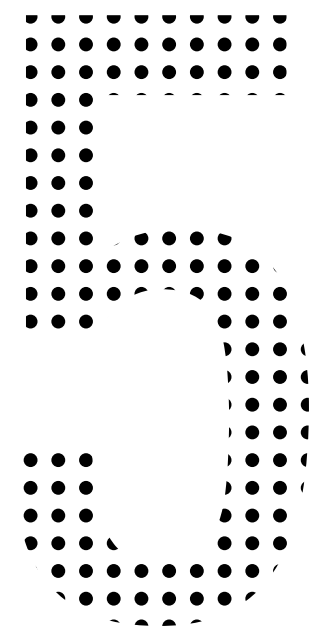

FASTFLATS

FASTFLAT is a modern vacation rental platform for booking short-term stays and managing property listings.

Travelers can explore destinations, book homes, and leave reviews with a smooth, user-friendly experience.

Hosts can manage availability, pricing, and bookings through a dedicated dashboard.

FASTFLAT ensures secure transactions, real-time communication, and seamless vacation planning.
